## **graphic / web designer**

**A little bit about me...**

I'm a freelance web/graphic designer with a passion for creating accessible, clean and attractive websites.

I like clean layouts with a twist, CSS, new JavaScript effects, Content Management Systems, Web 2.0 and I am obsessed with the natural looking websites.

I hope that one day designers and programmers will be talking the same language, CSS layouts would render in the same way in every browser and PCs would be as good as Macs.

# Profile

## I am a visual communications professional

**What I can do...**

I create visual/digital solutions.

I create and design CSS/XHTML handcoded layouts. I keep in mind best web practice when developing websites.

I have some experience working with opensource applications and JavaScript libraries.

I also do graphic designs. I love typography, corporate identity and advertising production.
